

Climate Change and Extreme Rain Events Jigsaw

Circle your assigned section: Global National (U.S.) Midwest

As you read, write down important ideas and evidence related to your topic. After you have obtained information about your own section, you will share your findings with classmates responsible for the other sections of the text, and learn about their topics as well.

Describe important ideas, key terms, evidence, and consequences/impacts related to climate change:

Summarize the information in the graphic(s) in your section of the text (How does these add to, extend, or clarify the information in the text? Use evidence from the graphic to support your answer.)

As your classmates share about the other sections of the text, record key ideas about their topics.

Global	National (U.S.)	Midwest
