

“How do we talk about climate change without it being scary and depressing?”

“How do we dispel common myths about climate change?”

“How do we have conversations with students about the climate crisis?”

Communicating About Climate Change in Our Classrooms and Communities

This virtual series is designed to help teachers—and their students—communicate effectively about the climate crisis. It features specific strategies and tools to help people navigate climate conversations in classrooms and communities. It also provides support for the planning and fielding of climate actions at a scale that feels right for each attendee. Whether it's practicing a single strategy or using a specific tool or fielding a full-blown climate action project in the community, it's all good!

FULL EVENT FEE \$50.00*
(Includes Sessions 1, 2, and 3)

SINGLE SESSION FEE \$25
(Pick and choose!)

SESSION 4 — FREE TO ALL!

* Student teachers/college students pay \$25

Session 1 (October 11, 4-6 PM)

Learn why communication about climate change is key, then examine climate communication tools and strategies for use with and by your students.

Session 2 (November 1, 4-6 PM)

Explore examples of communication strategies in climate action projects, then learn about a planning process for a place-based project.

Session 3 (December 6, 4-6 PM)

Refine a strategy, tool, or project idea by interacting with peers for feedback and support.

Session 4 (May 9, 4-6 PM)

Celebrate the work on climate change that teachers and their students accomplished during the 2022-23 school year, then explore the virtual gallery.

SCECHs Available for Sessions 2 & 3
